

We've Got Your Back

SHIELD™ is less than 1/2 the weight of concrete or polymer concrete covers!

Starting at only 16 pounds or 7 kg, the BULK ② SHIELD cover is less than half the weight of a Tier 15 cover, and 60% lighter than EN124-Class B125, AS3996-Class C or Tier 22 covers. You don't need to have superhero strength to pick one up. That's another reason why SHIELD is superior to concrete and polymer concrete for safety and strength. You can count on less back injuries when deploying SHIELD.

You don't have to be a superhero to lift a SHIELD cover

COVER WEIGHTS					
BOX TYPE	Width	Length	TIER 15 / EN124 CLASS B 125*	TIER 22 / AS3996 CLASS C*	SHIELD
